

## June 2026 WPE Grid Notes

### Instructions

Grid notes give you an index to the reading set, so you can easily find and link relevant materials. After you have read and marked up the reading set, enter the page numbers of sections that can help you to answer the question in the left-hand column. When you've finished, each row will give you source materials relevant to the question in the far-left column.

Grid notes are not an outline, but they can help you to compose a methodical argument.
